Project Development Phase

User Acceptance Testing (UAT) – Execution & Report Submission

Date	05 September 2026
Project Name	Incident Lifecycle Automation in ServiceNow
Maximum Marks	4 Marks

1. Purpose of Document

This document records planned UAT coverage and available project evidence for the Incident Lifecycle Automation in ServiceNow project. Testing covers incident creation, classification, assignment, knowledge management, investigation, SLA monitoring, resolution, closure, emergency changes, child incidents, and knowledge article generation.

2. UAT Test Case Analysis

The following test cases represent planned coverage. Actual results should be entered after executing each case; no unprovided pass/fail outcomes are claimed.

S.No.	Test Case / Scenario	Expected Result	Status
1	Incident creation	A new incident record can be created with required details.	Not Tested
2	Incident classification & update	Category, subcategory, priority and other classification fields can be entered/updated.	Not Tested
3	Incident assignment / reassignment	Incident can be assigned or reassigned to the appropriate support group.	Not Tested
4	Knowledge search / attach	Relevant knowledge can be searched and associated with an incident.	Not Tested
5	Level 2 investigation	Work notes and investigation details can be updated.	Not Tested
6	Resolution & closure	Resolution details can be recorded and the incident can be closed according to workflow.	Not Tested
7	SLA & escalation	SLA status and escalation visibility can be reviewed.	Not Tested
8	Emergency change / child incident	Related change or child incident can be created where required.	Not Tested
9	Knowledge article generation	Knowledge content can be generated from the resolution process where configured.	Not Tested

3. Defect Analysis

No actual defect log or severity-wise defect counts were supplied. To avoid inventing results, defect counts are recorded as Not Provided (N/P).

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	N/P	N/P	N/P	N/P	N/P
Duplicate	N/P	N/P	N/P	N/P	N/P
External	N/P	N/P	N/P	N/P	N/P
Fixed	N/P	N/P	N/P	N/P	N/P
Not Reproduced	N/P	N/P	N/P	N/P	N/P
Skipped	N/P	N/P	N/P	N/P	N/P
Won't Fix	N/P	N/P	N/P	N/P	N/P
Totals	N/P	N/P	N/P	N/P	N/P

4. UAT Coverage Summary

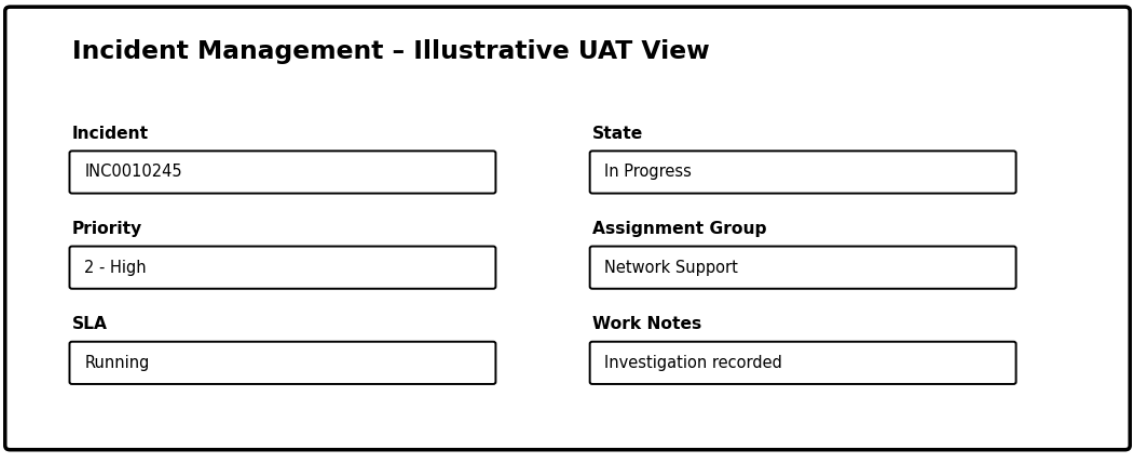

Section	Total Cases	Not Tested	Fail	Pass
Incident Creation & Classification	3	3	0	0
Assignment & Reassignment	2	2	0	0
Knowledge Management	2	2	0	0

Section	Total Cases	Not Tested	Fail	Pass
Level 2 Investigation & Resolution	3	3	0	0
SLA & Escalation	2	2	0	0
Emergency Change & Child Incident	2	2	0	0
Knowledge Article Generation	1	1	0	0
Total	15	15	0	0

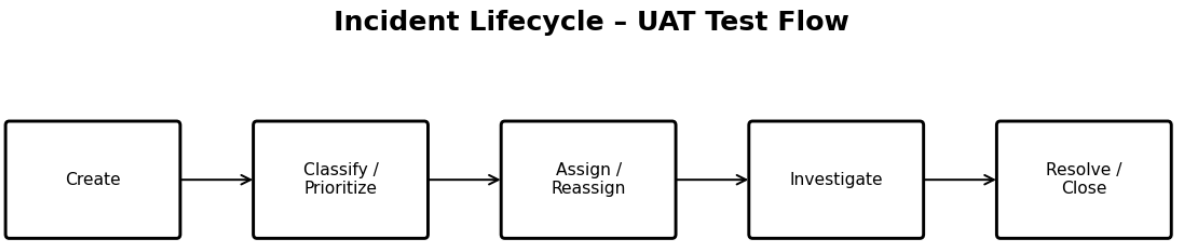

5. Project Evidence

The images below are retained from the supplied UAT document. They are illustrative project evidence, not a substitute for recording actual test execution and approval.

UAT Summary

This report defines UAT coverage for the Incident Lifecycle Automation in ServiceNow project. No actual open issues, executed pass/fail results, tester signatures, or independent approval record were supplied. Update the report after test execution.
